EQUIPMENT MAKE: Mercedes Benz EQUIPMENT MODEL: 3.0L 300D 6-cyl OIL USE INTERVAL:

3.004 Miles OIL TYPE & GRADE: Shell Rotella T 15W/40

FUEL TYPE:

Diesel

MAKE-UP OIL ADDED: 0 qts

ADDITIONAL INFO: OM 617

ANTHONY: You have a very nice wearing engine at 261,725 miles. If you look at the wear metals from your 3.0L and compare them to the universal averages, you can see that your 6-cylinder is doing very well, especially at steel parts. Insolubles (oil oxidation due to heat, use and blow-by) were normal at 0.4%, showing good oil filtration and complete combustion. Silicon at 2 ppm points to good air filtration. No contaminants were found and the oil's viscosity was normal for a 15W/40 product. As nice as this engine looks, your 300-D may well outlast all of us!
