

Testing Infrared Remote Control
Checking Batteries:

If the transmit button (1) is pressed longer than 1 second, the battery indicator lamp in the transmitter eye (2) briefly illuminates -indicating that the batteries are in order.

Change batteries if the indicator lamp does not come on.

Changing Batteries:

Unfold key from holder by pressing lock button (3). Pull off battery cover (4).

Change batteries, inserting new ones under contact spring (5) with plus (+) side facing up.

Press battery cover onto housing until locked in place.

Important!

Batteries contain materials that can harm the environment if disposed of improperly. Recycling of batteries is the preferred method of disposal. For disposal, please follow manufacturer's recommendation on battery package. Replacement battery: Lithium, type CR 2025 or equivalent.

Synchronizing System:

The system may have to be re-synchronized, if the transmitter is without voltage for several minutes.

To synchronize system, aim transmitter eye (2) at door or trunk receiver and briefly press transmit button (1). Within approx. 80 seconds, insert key in steering lock and turn it to position 2.

The infrared remote control should once again be operational
